Question # 16: YOUR CONSTRUCTIVE COMMENTS ON YOUR TA'S TEACHING SKILLS ARE EXTREMELY IMPORTANT. PLEASE WRITE YOUR COMMENTS IN THE TEXTBOX BELOW. PLEASE LIMIT YOUR COMMENTS TO 2000 CHARACTERS.

- Excellent TA.

- explained discussions very well, provided a lot of outside class time to help students

- Chris is a great t.a. If it wouldn't have been for him, i think i would be failing math. He was always willing to help us out when the sample midterms were given. He went over the material as many times as needed until we understood what he was talking about. His demeanor encourages us to ask questions without intimidation.

- He is an excellent math TA.

- I seriously think that all the TAs should be the one teaching the math classes. In the few math courses that I have taken, I have learned more from the TAs than the professors. Chris Walker by far is one of the best. I can tell how much he enjoys math by the way he teaches us in his discussion. He breaks down the material very well. He also makes sure that everyone is all in the same page so that no one gets left behind in understanding the material. Chris is also very gracious with his time. He knows that math can be a difficult subject for students therefore he always makes extra time to help. Whether it is through emails or extra office hours, Chris will spend whatever time needed to help you understand. I know that Chris is about to finish grad school after this quarter. UCR should pick him up as a professor.

- Chris was one of the best Teaching Assistants I have had at UCR. He was very approchable and easy to talk to as well as very helpful with any questions.

- Christopher Walker was honestly the best TA i have ever had. If it was not for Chris I would be COMPLETELY lost. He had so much enthusiasm for teaching math, he was available night and day to answer any questions we had. Chris was personable and easy to approach with any questions even if the concept was simple. A lot of times some mistakes teachers make is they assume since we are in there class we automatically know the material and often time make us feel stupid when we ask simple questions but not Chris. I honestly honestly truly enjoyed Chris as an instructor. I always believed that he should have been the instructor, it would have been a wonderful class. I was proud of Chris the fact that he is in a graduate or PHD program but he still made time to really be there for every one of his students. He answered emails and was prompt in doing so. I could go all day talking about how great Chris was. He was absolutely amazing, I would love to have him as a TA again.

- He makes math easy to understand and explains the material extremely well.

- I really enjoyed having Chris as my TA. Overall, he really helped me whenever i needed it. I taught well and was always there for us students.

- TA explained the material very well, but difficult to attend office hours and such

- Great teaching assistant.
