This TA was very helpful in all aspects. He was a very good teacher and always seem to be able to clarify things that the actual professor was not able to. Overall a great teaching assistant :)

The lecture really confused me, but by going to this discussion section, I was able to understand the material. In fact I found lectures almost pointless since it was such a large environment.

Section clarified material not understood from lecture. Review for exams was also very helpful.

Great TA! Learned the majority of Math 22 from him since I could not understand the actual teacher's examples. I really wish he had taught the class instead of Eliana Zoque. So, overall, I liked how he taught the class and thought he was a really effective TA! I liked the fact that we went through the entire midterm after it was graded but really think it would have helped to go over the practice midterms before the exam.

Mr. Walker was a good TA. He went over material we did in lecture and added his own examples to make sure we understood the material. He took the time to extend his office hours to make sure we had help if we needed it. He was easy to access and very helpful.
