

MATH & CS 11, INTRO TO DISCRETE STRUCTURES

GENERAL INFORMATION:

Lecture (16060): TR 8:10 AM - 9:30 AM
Room: WAT 2240
Instructor: Muralee (Dr. M. Muraleetharan)
Office: 225 Surge Building
Phone: (951) 827-6482
E-mail: muralee@math.ucr.edu
Office hours: TR 1:00 PM- 2:00 PM, and by appointment

Teaching Assistant: DEPALMA, ELIE

Discussion (11 002): M 8:10 AM - 9:00 AM. Room: INTN 1006

Textbook: Discrete Mathematics and Its Applications by Kenneth H. Rosen, Sixth Edition.

EXAMS AND GRADING:

Homework: 9 - 10 Homework sets
Midterm exam: Tuesday 02/09/10, during the lecture.
Final exam: Saturday 03/13/10, 11:30 AM - 2:30 PM
Grading: The final grade is composed of:
50% of the Final exam grade
30% of the Midterm exam grade
20% of the Homework

Your lowest homework score will be dropped.

The following grading scale will be used:

A student with an average of at least 90% will receive a grade of at least A-.

A student with an average of at least 80% will receive a grade of at least B-.

A student with an average of at least 65% will receive a grade of at least C-.

A student with an average of at least 50% will receive a grade of at least D-.

1. The final exam is comprehensive.

2. All exams are closed notes and books. Calculators are not allowed.

3. No make up exams - If you miss the midterm because of a documented medical situation or family emergency, the grade will be computed without taking into account the missed exam.

COURSE OUTLINE:

Prerequisites: MATH 009A or MATH 09HA; CS 010 or MATH 009B or MATH 09HB. If you are unsure whether your background is adequate for this course, please make an appointment to discuss this with me immediately.

Introduction to basic concepts of discrete mathematics with emphasis on applications to computer science. Topics include propositional and predicate calculi, elementary set theory, functions, relations, proof techniques, elements of number theory, enumeration, and discrete probability (Chapters 1, 2, 3, 4, 5 & 6 from the textbook).

CLASS MEETINGS and ATTENDANCE: Classes will meet three times each week. Lectures will be given on Tuesday and Thursday. Each section will meet for one discussion each week on Monday. **Attendance is required.**

COLLABORATION and ACADEMIC INTEGRITY: Students are encouraged to work cooperatively on practice problems. There is quite a bit of evidence that this sort of collaboration improves performance in mathematics courses. However, all work submitted for grading must be the work of the individual submitting the work. No collaboration is permitted on work submitted for grading. Copying another student's homework is a violation of the University Code of Conduct.
