Question # 16: YOUR CONSTRUCTIVE COMMENTS ON YOUR TA’S TEACHING SKILLS ARE EXTREMELY IMPORTANT. PLEASE WRITE
YOUR COMMENTS IN THE TEXTBOX BELOW. PLEASE LIMIT YOUR COMMENTS TO 2000 CHARACTERS.

- Mr. S is a great TA. I wouldn't be surprised more and more students find themselves taking his courses.

- Prasad is the best TA that I have had while here at UCR. I believe that he is the reason why I am passing the class. If it were not for him then I do not think that I would understand any of the material. He explains everything very clearly and wants everyone to be able to understand it. I think that if he were to teach a course then everyone would do well because he cares about his students.

- Great TA, very helpful, and very knowledgeable in his department. I wish more TA's were as helpful, and available as he has been throughout the course.

- I am really appreciative that I received you as a TA. You made that class ten times as easy (eventhough it was still difficult). However, you teaching techniques are great and you made the material seem to be easier than it was. Thank you...

- Mr. Senesi has been very helpful to my comprehension of Calculus this quarter; he gives pertinent examples and seems very concerned that everyone in the class is able to understand. He also reserves time to point out important specifics that will aid us in completing our work. He was a very effective teaching assistant. Thank you!

- Prasad, is a GREAT TA. He should be a math teacher already. The students need him.

- Prasad is a great TA and he is very approachable and helps you when you need it.

- Mr. Senesi was an excellent math 9b discussion teacher. He explained the material in a very clear and organized matter, which inevitably made the material much easier to understand. He is very helpful TA!

- Prasad has been a great help in my Calculus 9B study. He would offer his own time to make us study guides and give us very effective advice. He not only knows what he's talking about, I thought he was at a very high level in teaching. Prasad is always enthusiastic about his teaching and it motivates to do some math problems whenever I have free-time. He makes me challenge to the next level. I would like to thank him for his dedication towards his students.
