

(Mock) Quiz Zero

Linear Algebra

UCR Math-131, Fall 2020

1. What is your name?

All the your responses to homework and quizzes for the course will be uploaded to Gradescope. You can upload either images or PDFs. I imagine the most convenient workflow for you would be to write-up your responses on paper and upload photos of those papers. A couple technical requests about uploading photos to Gradescope:

- Make sure your photos are oriented the same way as your writing. Like, when you take the photo, don't point your phone straight down at your writing, but make sure to *slightly* tilt it so the phone doesn't change the orientation of the photo. My neck will thank you for this.
- Please don't take high-definition quality photos of your responses. This creates a large file that takes awhile to upload for you, and takes a while to load for me when I'm reading. Smaller, standard quality photos are much better. Just check real quick that your writing is still legible in the photo.
- Try to make sure your response begins at the top of the photo so I don't have to scroll down to see your writing.
- Since you're uploading your photos under your own account on Gradescope, there's no need to write your name on your uploads. In fact keeping your name off your upload helps keeps grading impartial by making it anonymous.
