

UPDATED GENERAL INFORMATION — MAY 7, 2018

The midterm examination (further information)

The main source of information is the file `aabUpdate05.132.s18.pdf`, along with further recommendations including homework files, exercise files, and last year's first examination. The files `gram-schmidt.pdf` and `gram-schmidt2.pdf` give the formulas for orthogonalization and their justifications respectively. I also recommend the problems in `aabUpdate03.132.w17.pdf` (this is NOT a typographical error) and the first two problems in `aabUpdate07.132.w17.pdf`.
