

UPDATED GENERAL INFORMATION — NOVEMBER 7, 2013

The second quiz is postponed for one week to **Tuesday, November 19, 2013**. It will resemble an exercise from one of Sections II.3, III.1 (but only the material on 2-dimensional geometry in the latter), and III.2–III.3. Although Sections II.4 and II.5 do not appear on this list, it is very likely that some material from the beginnings of these sections will be implicit in the quiz problem. Specifically, this includes everything up to the subheading *Classical superposition* in Section II.4 (but nothing further) and everything up to the subheading *Parallelism and affine transformations* in Section II.5 (but nothing further). Also, as is generally the case with mathematics courses, earlier material (specifically from Sections I.0–I.1, I.3–I.5 and II.1–II.2) may be implicit in the quiz problem.
