

UPDATED GENERAL INFORMATION — NOVEMBER 25, 2013

The third quiz is postponed to **Tuesday, December 3, 2013**. It will resemble an exercise from one of Sections III.4 – III.6 in the notes.

Detailed proofs of some results in neutral geometry

The two documents described below have been posted; they fill in the details of certain proofs that were not given in Sections V.2 and V.3 of the course notes.

- (1) As noted in the lectures, the document `neutral-proofs1.pdf` contains synthetic neutral-geometric proofs of the results listed in Section V.2 of the notes (along with a few additional results). In keeping with the overall pattern of the course, none of the proofs for 3-dimensional neutral geometry will be covered on the third examination.
- (2) A complete and detailed proof of Theorem V.3.8 in the course notes has been posted in the file `neutral-rectangles.pdf`.
