

**UPDATED GENERAL INFORMATION — JANUARY 21, 2009**

**Change to second homework assignment.** Only the problems for Section I.4 will be due on Friday, January 23. The remaining problems will be part of the third assignment, which will be due on **Friday, January 30, 2009** (the day of the first exam, but that might be postponed).

The first quiz will cover material through Section 1.4 (including the solved problems in Section I.5). It will be computational, at the level of finding whether two lines intersect or computing the barycentric coordinates of a point in the coordinate plane with respect to three given noncollinear points.
