

UPDATED GENERAL INFORMATION — JANUARY 19, 2010

1. There are revised and expanded versions of the main course documents which have names of the form `dg*x2.pdf`. Some misprints have been corrected, and everything is now complete through Unit II. One important exercise has been added to Section I.4.
2. The first quiz will cover material through Section I.4.
3. In the files with homework exercises, stars have been added to indicate problems which are more challenging and have lower priority. The course ground rules should be amended to state that students are responsible for knowing how to do the unstarred problems in the exercise file.
4. A full solution to exercise I.2.5 has been posted in the file `problem125.pdf`.
5. The following files contain important supplements to Unit I of the course notes, and their contents may be covered in course examinations or quizzes:

`curvexamples.pdf`
`linapprox.pdf`
`skewlines10.pdf`
`cyc-curves.pdf`
`helix.pdf`
`frenetnote.pdf`
6. The file `dglinks2010x2.pdf` contains clickable versions of the WWW links in certain course documents including the course notes. This file will be updated with links for Units III and IV.
7. Solutions to exercises will be provided and posted upon request to either the primary instructor or the teaching assistant.
