

UPDATED GENERAL INFORMATION – DECEMBER 14, 2019

Revised statement on course grades

In the information sheet posted at the beginning of the quarter, it was stated that the midterm and final examination would be worth 27 and 45 per cent respectively, with the second exam 60 per cent longer than the first. Since the final examination was exactly as long as the midterm examination, I have also calculated the course grades with each examination comprising 35 per cent of the grade and the quizzes comprising the remaining 30 per cent. The larger of the two scores was used to determine the course letter grade.
