

**UPDATED GENERAL INFORMATION –
MARCH 10, 2020
(SECOND POSTING)**

This afternoon the University Administration has announced a moratorium on in-class meetings. In particular, there will be no class meeting on March 11, and new arrangements must be made for the final examination scheduled for Wednesday, March 18. The proof of the final theorem from the lecture on Monday can be found on the last two pages of <http://math.ucr.edu/~res/math145A-2017/math145Anotes13c.pdf>. If you have review questions, please feel free to send them to the teaching assistants or me electronically. I also plan to hold additional office hours tomorrow afternoon from 1:30 to 3 P.M.

The Administration has provided extremely limited information for alternatives to the final examination, so I need a little time to decide on how to proceed. At this point I feel that more input is needed in order to determine final grades, so there will be something due next week. Earlier today I posted a file on practice problems covering the rest of the course. More information will be posted in the course directory tomorrow.
