

Mathematics 205A
Introduction to Topology — I
Course Notes — Part One
Revised, Fall 2005, Fall 2008, Fall 2014

Department of Mathematics
University of California, Riverside

Table of Contents

Introduction	iii
I. Foundational material	1
1. Basic set theory ⁽¹⁾	2
2. Products, relations and functions ⁽¹⁾	3
3. Cardinal numbers ⁽¹⁾	4
4. The real number system ⁽¹⁾	9
II. Metric and topological spaces	10
1. Metrics and topologies ⁽²⁾	11
2. Closed sets and limit points ⁽²⁾	18
3. Continuous functions ⁽²⁾	22
4. Cartesian products ⁽²⁾	29
III. Spaces with special properties	40
1. Compact spaces — I	40
2. Complete metric spaces ⁽¹⁾	47
3. Implications of completeness ⁽¹⁾	53
4. Connected spaces	58
5. Variants of connectedness	66
IV. Function spaces	71
1. General properties ⁽⁰⁾	71
2. Adjoint equivalences ⁽⁰⁾	77
V. Constructions on spaces	79
1. Quotient spaces	79
2. Sums and cutting and pasting	85
VI. Spaces with additional properties	91
1. Second countable spaces	91
2. Compact spaces — II	96
3. Separation axioms ⁽²⁾	98
4. Local compactness and compactifications	104
5. Metrization theorems ⁽⁰⁾	112
<i>Appendices:</i>	
A. Topological groups	119
B. Stereographic projection and inverse geometry	129
C. Homogeneity of open sets in Euclidean spaces	133
D. Normal forms for orthogonal transformations	137
References	140
Summary of Files in the Course Directory	144
