

**Mathematics 205A**

**Topology — I**

**Course Notes**

**Revised, Fall 2005, and Fall 2008**

**Department of Mathematics**

**University of California, Riverside**

# Table of Contents

I.	<b>Foundational material</b> .....	1	
1.	Basic set theory .....	2	
2.	Products, relations and functions .....	3	
3.	Cardinal numbers .....	5	
4.	The real number system .....	9	
II.	<b>Metric and topological spaces</b> .....	10	
1.	Metrics and topologies .....	11	
2.	Closed sets and limit points .....	18	
3.	Continuous functions .....	22	
4.	Cartesian products .....	29	
III.	<b>Spaces with special properties</b> .....	39	
1.	Compact spaces — I .....	39	
2.	Complete metric spaces .....	47	
3.	Implications of completeness .....	54	
4.	Connected spaces .....	59	
5.	Variants of connectedness .....	65	
IV.	<b>Function spaces</b> .....	69	
1.	General properties .....	69	
2.	Adjoint equivalences .....	75	
V.	<b>Constructions on spaces</b> .....	77	
1.	Quotient spaces .....	77	
2.	Sums and cutting and pasting .....	83	
VI.	<b>Spaces with additional properties</b> .....	89	
1.	Second countable spaces .....	89	
2.	Compact spaces — II .....	94	
3.	Separation axioms .....	96	
4.	Local compactness and compactifications .....	101	
5.	Metrization theorems .....	109	
<i>Appendices:</i>			
A.	Topological groups .....	116	
B.	Stereographic projection and inverse geometry .....	126	
C.	Homogeneity of open sets in Euclidean spaces .....	130	
D.	Normal forms for orthogonal transformations .....	134	
References .....			137
Summary of Files in the Course Directory .....			140
