

UPDATED GENERAL INFORMATION — NOVEMBER 18, 2008

As noted previously, the second midterm examination will take place on **Monday, November 24**. As usual in advanced mathematics courses, the exam may include material from anything in the course covered up to the cutoff point (which is Section VI.1 in this case), but the new material covered will run from the last part of Section III.2 (beginning with the subsection *Intersections of nested closed subsets*) through the end of Section VI.1. However, the material on the Contraction Lemma and its applications in Section III.3 will not be covered, and similarly nothing in Unit IV will be covered.
