UPDATED GENERAL INFORMATION — MARCH 10, 2018

Corrections to `takehome2-2018.pdf`

The March 6 document has some typographical errors in describing the vertices of the polyhedra. Here are the correct descriptions:

1*a***.**   The hollow octahedron in 3-space with vertices A, B, C, D, E, F should have the following 2-simplex faces:

$$ACD \ , \ ADE \ , \ AEF \ , \ ACF \ , \ BCD \ , \ BDE \ , \ BEF \ , \ BCF$$

1*b***.**   The boundary of a triangular prism with vertices A, B, C, D, E, F should have the following 2-simplex faces:

$$ABC \ , \ DEF \ , \ ADE \ , \ ABE \ , \ BEF \ , \ BCF \ , \ CDF \ , \ ACD$$

Corrected `pdf` and `tex` files will be posted later today. As before, sketching the polyhedra is strongly recommended.
