

UPDATED GENERAL INFORMATION — MARCH 16, 2018

The final examination

This will be Monday, March 19, beginning at 9 AM and not 8 AM; I will not be there at 8. The exam will be designed to be completed in 90 minutes, but 2 hours will be available. There will be six questions, with one on material covered on the first examination and the other five on subsequent material.

Additional copies of older examinations have been placed into the course directory folder `winter2014`. Practice problems for the exam will appear in the file `review2.pdf`.

For the sake of completeness, I have written up a more detailed discussion of reduced homology, with proofs, and it is posted as `reduced.pdf` in the course directory.
