

UC RIVERSIDE - Student Comments of Instructor, Discussion Courses - Fall 2018

Course: MATH 022 Section: 004 - CALCULUS FOR BUSINESS
Instructor: Ryan Ta

Question # 18: YOUR CONSTRUCTIVE COMMENTS ON YOUR GRADUATE STUDENT INSTRUCTOR'S TEACHING SKILLS ARE EXTREMELY IMPORTANT. PLEASE WRITE YOUR COMMENTS IN THE TEXTBOX BELOW. PLEASE LIMIT YOUR COMMENTS TO 2000 CHARACTERS.

- Very approachable and personable. His thorough understanding of the material was extremely helpful in a course of this difficulty. If I was to give any constructive criticism, I'd say he could have been more effective had he provided more material for us to go over on review days rather than just asking us what we needed help with. Other than that, he was very accessible and very willing to help.
- Really appreciated T.A.'s openness to help. Goes a little fast when explaining something, but good at helping students with problems.
- Ryans a great guy and gave amazing help in the discussion.
- His writing was really hard to understand, went over examples really fast and in a sloppy way.
- He would answer any questions that students would have and assist you personally if you had any problems on a particular lesson, however, he made a few mathematical errors.
