

# UC RIVERSIDE - Student Comments of Instructor, Discussion Courses - Fall 2019

Course: MATH 149A Section: 011 - PROB & MATH STATISTICS  
Instructor: Ryan Ta

**Question # 18:** YOUR CONSTRUCTIVE COMMENTS ON YOUR GRADUATE STUDENT INSTRUCTOR'S TEACHING SKILLS ARE EXTREMELY IMPORTANT. PLEASE WRITE YOUR COMMENTS IN THE TEXTBOX BELOW. PLEASE LIMIT YOUR COMMENTS TO 2000 CHARACTERS.

- One of the best TA's I've had at UCR. Made his own website to help out students and it was more effective than what the professor did.
- Ryan is really helpful with understanding the material. He goes above and beyond and works out full proofs and problems to help us out with the quizzes and exams. He's pretty understanding and tries his best to help us.
- Ryan is cool.
- The typed up proofs and examples from the discussion were very helpful from exam preparation. Discussions were a bit unprepared but the typed up worksheets clarified everything afterwards.
- none
- He provides examples that better represent the material that is presented in class. He helps and gives up preparation material for all assessments, which is helpful. He also makes connections between the different sessions, i.e. our professor vs the other professor teaching the same class. It is helpful because it is providing more learning material for us to learn.
- The TA did his best to communicate and present material that supplemented the class.
- Ryan is very helpful and put much effort into providing us with supplemental materials to study for the course. I honestly learned more through him than through our professor because of the amount of material he made available to us in extra practice problems and notes. He truly cares about our success in the course and is one of the most helpful TAs I've ever learned under.
- Always ready to help.
