

# UC RIVERSIDE - Student Comments of Instructor, Discussion Courses - Fall 2019

Course: MATH 149A Section: 012 - PROB & MATH STATISTICS  
Instructor: Ryan Ta

**Question # 18:** YOUR CONSTRUCTIVE COMMENTS ON YOUR GRADUATE STUDENT INSTRUCTOR'S TEACHING SKILLS ARE EXTREMELY IMPORTANT. PLEASE WRITE YOUR COMMENTS IN THE TEXTBOX BELOW. PLEASE LIMIT YOUR COMMENTS TO 2000 CHARACTERS.

- sometimes you are a little unorganized and sometime you confuse me on things i already understand, but the discussion webpage was really helpful. thank you for a wonderful quarter.
- Ryan definitely did more than what he was required to do. I worked with Ryan every week during office hours and he did a great job in helping me understand the material learned in class. Without him, I would have been lost in the course but Ryan always made sure to clear up any confusion I had. He was always prepared for class and was ready to answer any questions we had. He definitely went above and beyond.
- The only reason i was able to pass the class so thank you :D
- Ryan is an excellent TA. He is always prepared and posts discussion notes online. This is extremely helpful because sometimes while taking notes you might miss something important. Thus, once going through your notes you might become confused. Having the discussion notes online allows students to work through the material again to resolve their confusion.
- One of the best TA I have ever met!
