Course: MATH 150A Section: 004 - INTERMEDIATE ANALYSIS
Instructor: Ryan Ta

Question # 18: YOUR CONSTRUCTIVE COMMENTS ON YOUR GRADUATE STUDENT INSTRUCTOR'S TEACHING SKILLS ARE EXTREMELY IMPORTANT. PLEASE WRITE YOUR COMMENTS IN THE TEXTBOX BELOW. PLEASE LIMIT YOUR COMMENTS TO 2000 CHARACTERS.

- Best TA. Love you Ryan

- I really like that Ryan explains the topics that were discussed in class. He is also constantly comparing his solutions to the professors to ensure that we have the correct answers and theorems. I appreciate how helpful he is during discussion session and how he prepares us for the homeworks and quizzes.

- By far, Ryan is one of the most helpful and kindest TA I have ever had at UCR. Not only was he very knowledgeable of the subject, he was also very patient when explaining difficult concepts. He was very approachable as well and was able to answer all the questions I had. He is very passionate when he teaches and demonstrated that he put in tremendous effort to help us learn. I appreciate everything he has done to make sure we didn't fall behind in class. If the chance came up again, i would have him as a TA again.

- One of the best TA's I have ever had. Ryan really helped with trying to fully understand the material. He was always available and willing to help.

- This guy is crazy and overpowered, he did pretty well at this discussion.

- Great TA, I have had many math TAs(my last year) and Ryan is definitely at the top. He is extremely useful in office hours, and his math page is also very useful. He worked hard and really cared if I did not understand something. He genuinely seemed concerned when i would not grasp a concept. I know he would be an exceptional professor. 10/10

- Ryan goes above and beyond for his students. He makes solutions for the homework even though he doesn't have to and is a fair grader. He tries to make sure students know the concepts and wants students to do well in the course. He is one of the best TAs in the math department.
